

Alabama Section ASCE 2009 Summer Meeting Wrap Up

The 2009 Alabama Section Summer Meeting was a great success. We had 180 attendees and 19 exhibitors at the event. The technical program consisted of two tracks with a total of 31 speakers covering structural, environmental, transportation, and geotechnical topics in civil engineering. Highlights of the business meeting and luncheon included guest speaker Mr. David Mongan, P.E., F.ASCE, Past-President of ASCE. We also recognized our new Life Members, of whom Mr. Malcolm Beasley, P.E., F.ASCE was in attendance. Six students were recognized as scholarship winners, including James Kyzar of the University of Alabama as the Outstanding Student of the Year.

If you are wondering what you missed from the technical program, the schedule from the meeting is available on the Section website www.alabama-asce.org.

A big thank you to the 19 exhibitors and 12 sponsors that helped make the meeting possible.

Plans are already underway for next year. As soon as the date is finalized (at the beach in July, 2010), notice will be posted on the Section web-site and an e-mail will be sent to the Section e-mail list.
