

METERING SOLUTIONS

ASCE Winter Meeting
February 23rd, 2022

**Communication &
Measurement
in Real Time**

WHAT IS AMI?

Advanced metering infrastructure (AMI) is an integrated system of smart meters, communications networks, and data management systems that enables two-way communication between utilities and customers

ALTERNATIVES?

Automated Meter Reading (AMR)

A form of communication technology that water utilities use to collect water consumption and status data from water meters. AMR systems can be either walk-by or drive-by

Manual Meter Reading

Each meter is visually inspected, and that data is manually entered

AMI Benefits

8,760 Meter Reads Annually

Increased Employee Safety

Improved Operational Efficiency

Increased Billing Accuracy

Access to Real Time Data & Analytics

Resource Allocation Opportunity

Proactive Not Reactive System

Increased Customer Service

FlexNet Infrastructure Operations

- 24 x 7 monitoring of system health and performance
- Field operations team members located across APC territory
- APC responsible for the O&M of the Base Stations
- Emergency response during storm events
- 72-hour battery backup power at base stations

**APC
OPERATIONS
CENTER**

FlexNet Network

Customer Base

1.53 Million devices on the network

Service Territory

Early Adopter

Advanced Applications

Outage and Restoration

Voltage Monitoring

Customer Phase Detection

Capacitor Bank Monitoring

Other Applications

Demand Response

Lighting

600+ Base Stations and Growing

99.90% Read Success Rate

OTA Firmware Grades | OT Device Configurations

**APC
TERRITORY**

FlexNet Network

An APC-managed service for utilities that will offer remote meter reading capabilities to water, gas and electric systems in a secure environment using the AMI network.

By leveraging our AMI infrastructure, we can increase speed to market and lower the overall network cost to our customers

UTILITY SERVICES
**Advanced Metering
Infrastructure**

Common Pitfalls with AMI Meter Reading

Significant capital investment

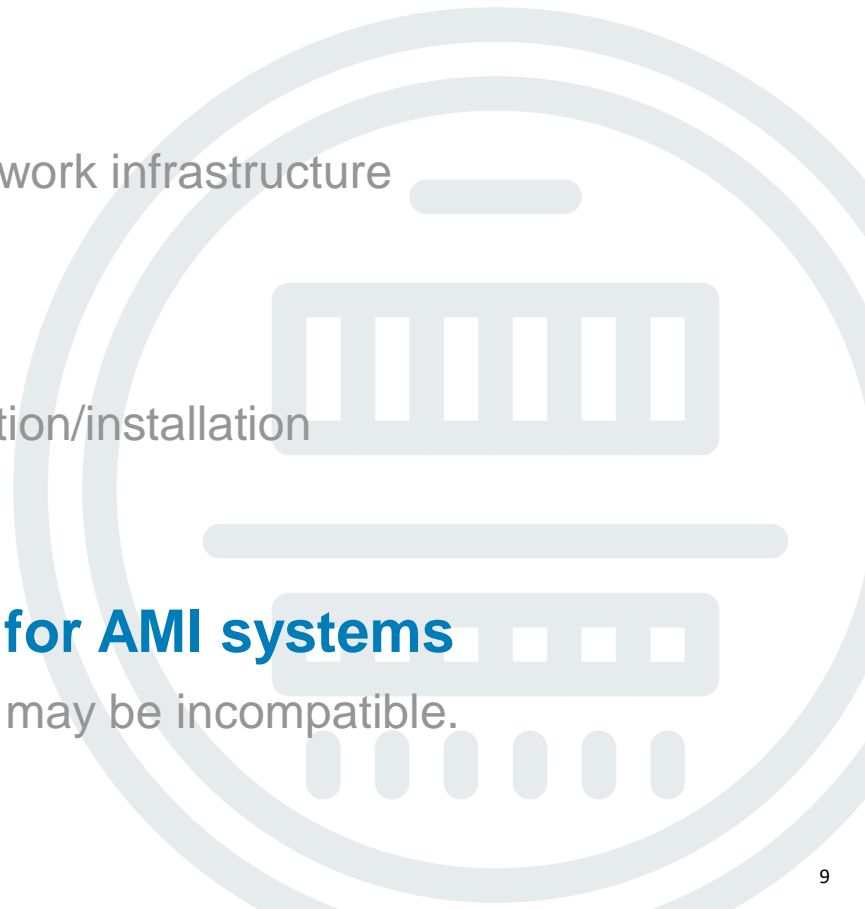

Capital required to upgrade meter and network infrastructure

System integration issues

Billing errors from improper meter registration/installation

Lack of industrywide standards for AMI systems

Components from different manufacturers may be incompatible.

Partnering with Industry Leaders

Network infrastructure provider
AMI Network maintenance
Potential for capital provider

Manufacturer of product
Software provider
Data hosting

Distributor of product
Expert product knowledge
Billing integration support

UTILITY
SOLUTIONS OF
AMERICA, INC

Sensus certified installer
Warranty assurance option
Monitor of analytics

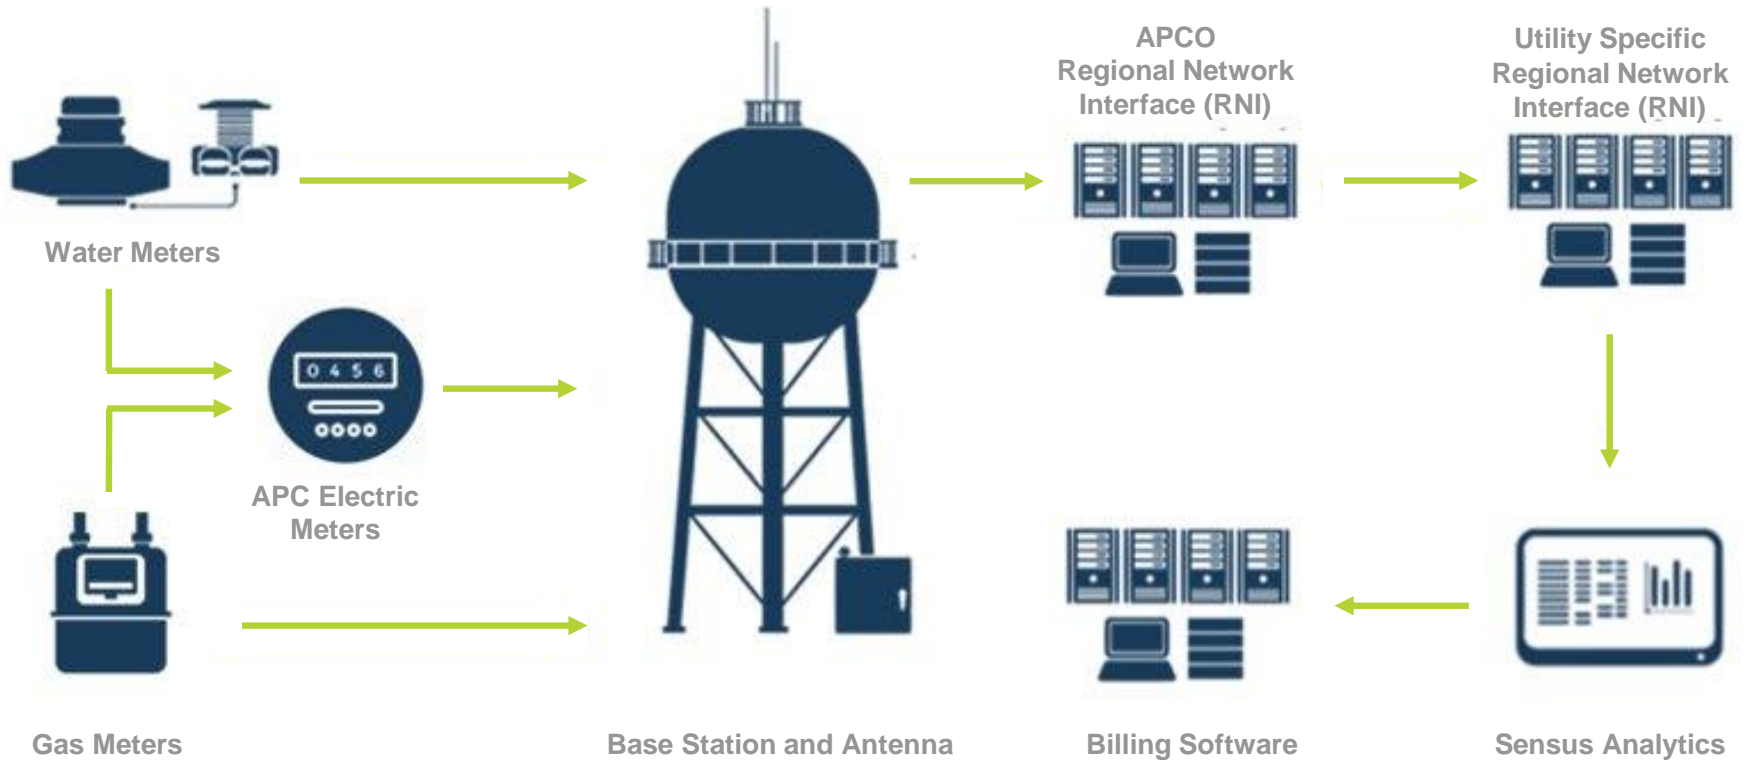

Utility billing software
Work order management
Back-office solutions

Ownership Options

With either option APC will work closely with the customer to ensure the meters selected are compatible with the APC transmitter

OPTION ONE Meter Read Only	OPTION TWO Meter Read & Lease
<p data-bbox="266 489 853 587">AMI Standard – Sensus RNI meter reading with analytics</p> <p data-bbox="548 604 575 631">+</p> <p data-bbox="227 653 900 801">Customer utilizes existing meters or purchases meters / transmitters</p> <p data-bbox="386 882 738 915">5, 10 or 15-year term</p>	<p data-bbox="973 489 1561 587">AMI Standard – Sensus RNI meter reading with analytics</p> <p data-bbox="1255 604 1282 631">+</p> <p data-bbox="1008 653 1530 746">Customer leases meters / transmitters from APC</p> <p data-bbox="1174 875 1383 908">15-year term</p>

AMI Standard

SENSUS Analytics

The SENSUS logo consists of three horizontal green bars of increasing length above the word 'SENSUS' in a bold, blue, sans-serif font.

Long-term data storage (3+ years)

Consumption intervals, alarms and voltage
Data integration (GIS, Asset Management, Billing)
Ease of exporting

Robust reporting and visualization of data elements

Modular and flexible design

Data access, insight and analytics

Functionality can be used in lieu of MDM

Partnership Benefits with APC

FINANCIAL

Known monthly expense
Phased approach
Lease Option

RESOURCES

APC monitors and maintains AMI system
24/7 Emergency response
Utility can focus on other parts of the business

INTANGIBLES

Reduced infrastructure investment
Redundant electric meter “buddy” system
Peace of mind

Next Steps

CUSTOMER

- Provide route file
- Decision to purchase or lease meters/registers
- Full meter install or phase-in
- Meter quantities by size class
- Install new meters

ALABAMA POWER

- Propagation study
- Prepare pricing proposal
- Discuss estimate and select meters (If replacing)
- Sync meters with APC network
- Provide billing file & analytics

METERING SOLUTIONS

From Alabama Power

Supporting Your Success

Pre-deployment planning

Endpoint installation

System integration

Data & analytics training

Network deployment

On-going support

Questions?

Most robust and reliable AMI network in Alabama

Increase speed to market

Lower network cost, known monthly expense

APC 100% responsible for system O&M

Trusted partner
