

METERING SOLUTIONS

Advanced Metering Infrastructure (AMI)

More than Just Meter Reading

ASCE Winter Meeting

March 7th, 2023

Why We're Here

2007

Started building out the state's largest “Advanced Metering Infrastructure” (AMI) system to service our 1.5M customers

2019

Opened the APC network to water and gas utilities who want to realize the benefits of AMI for their system

Traditional Reading Options

Manual

Each meter is visually inspected, and that data is manually entered

Drive-By (AMR)

A form of communication technology that water utilities use to collect water consumption and status data from water meters. AMR systems can be either walk-by or drive-by

Build Your Own Network (AMI)

Utility builds and maintains their own infrastructure

AMI Benefits

8,760 Meter Reads
Annually

Increased Employee Safety

Improved Operational
Efficiency

Increased Billing
Accuracy

Access to Real Time Data &
Analytics

Resource Allocation
Opportunity

2-Way Capabilities

Increased Customer
Service

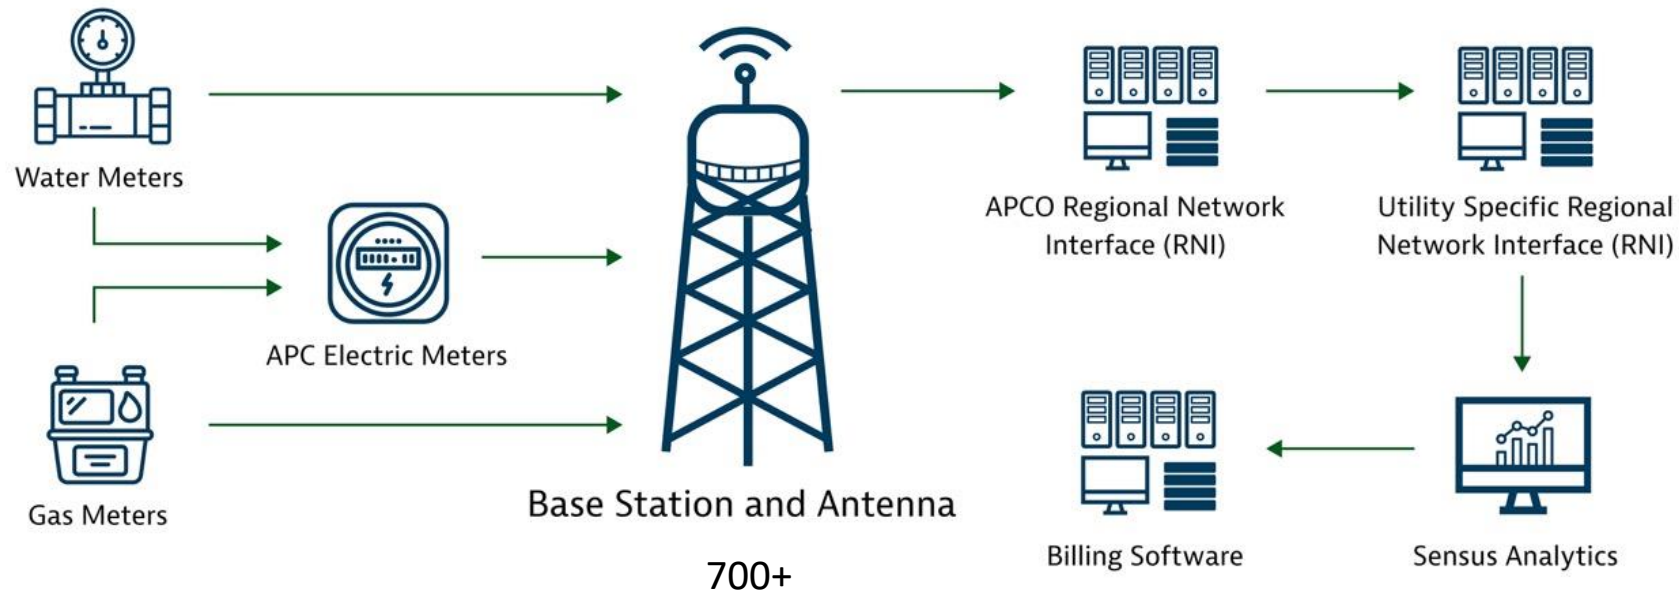

APC Metering Solutions Customers

34,000 Meters
(In addition to APC's 1.5M)

APC FlexNet Infrastructure

Partnership Benefits with APC

FINANCIAL

- **Known** monthly expense
- Flexibility for **phased-in** approach
- Meter/transmitter lease **option**

RESOURCES

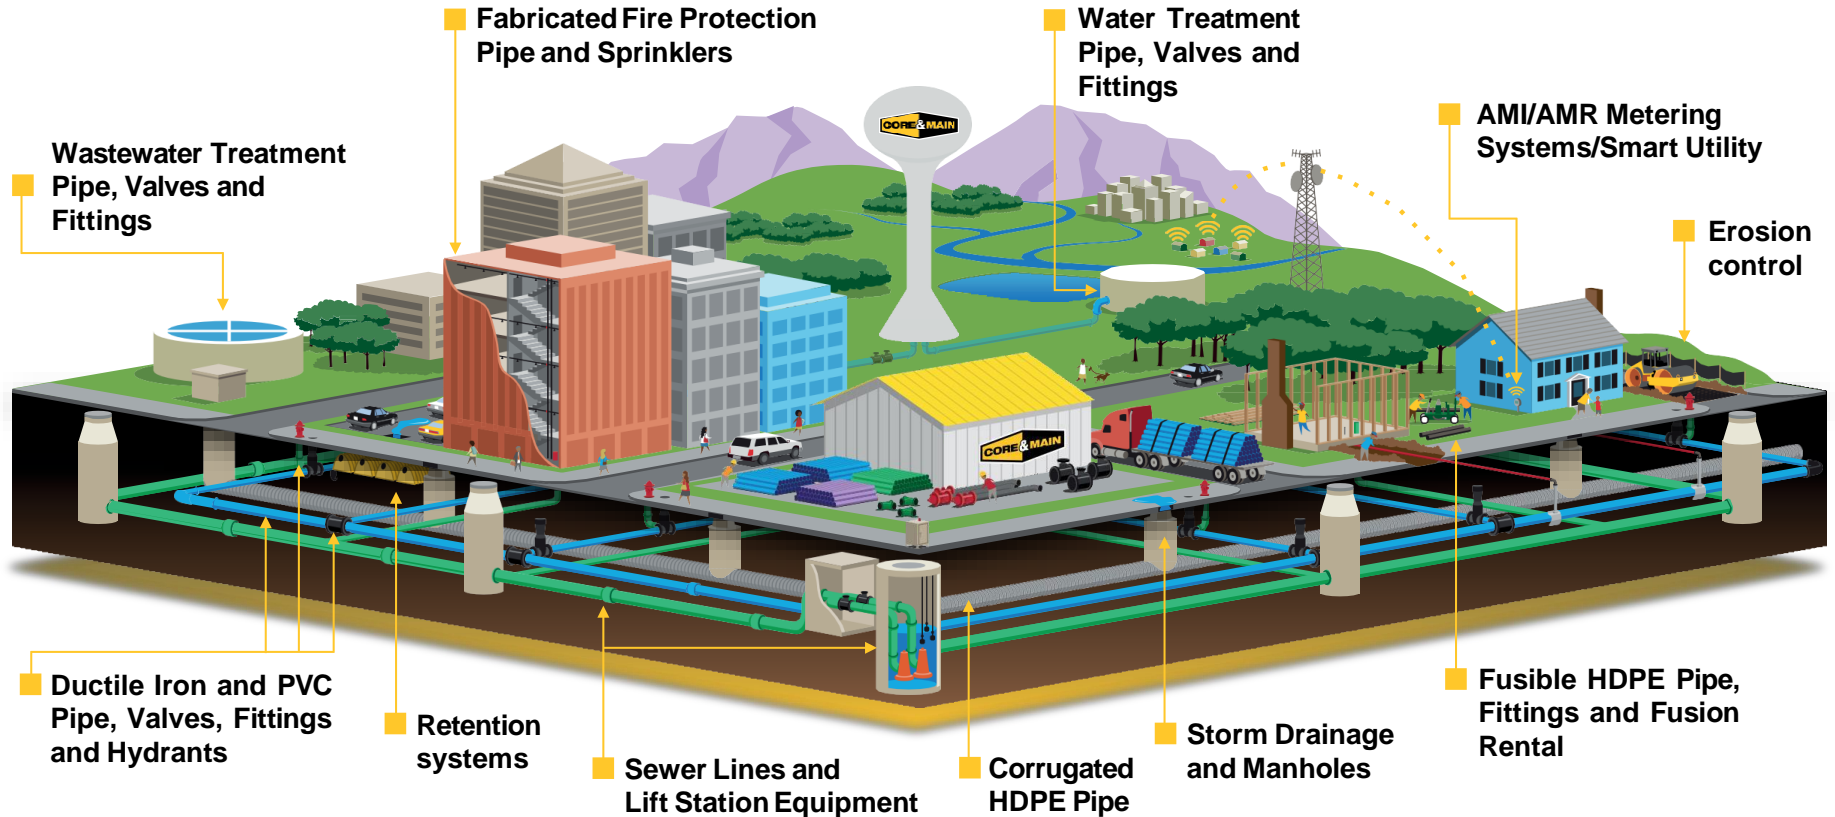

- Largest, most **reliable & private** AMI network in Alabama
- APC monitors and **maintains** AMI system
- **24/7** emergency response. **72-hour** battery backup

INTANGIBLES

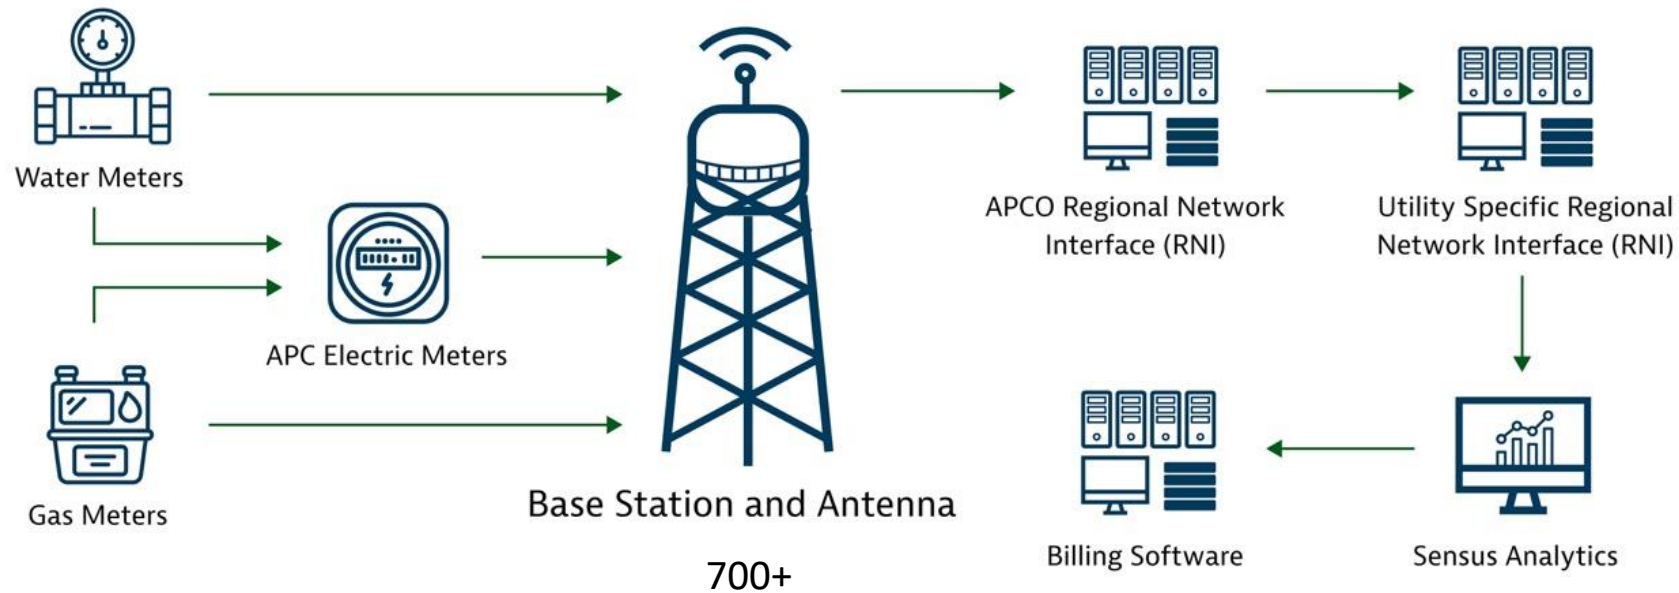

- **Eliminates** infrastructure investment
- Allows utility to **focus** on other key parts of the business
- **Partnership** with APC offers customer peace of mind

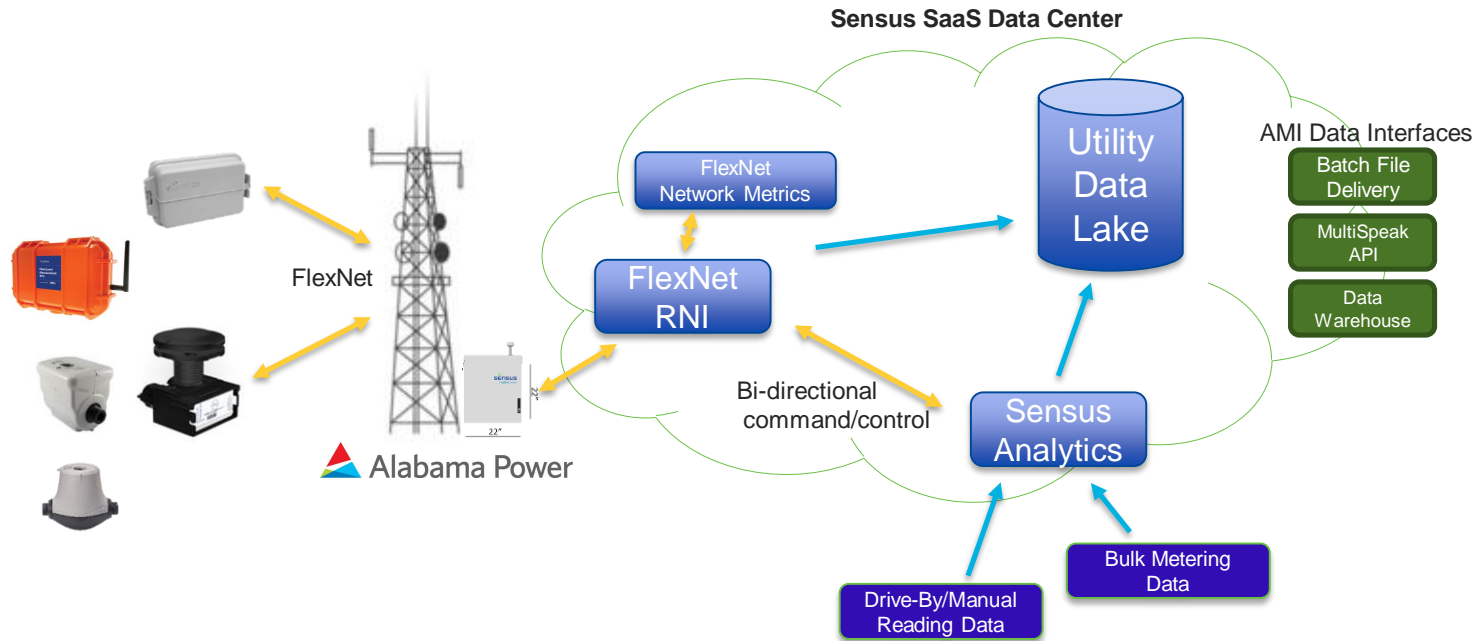

PRODUCTS AND SERVICES FOR CITY INFRASTRUCTURE

APC FlexNet Infrastructure

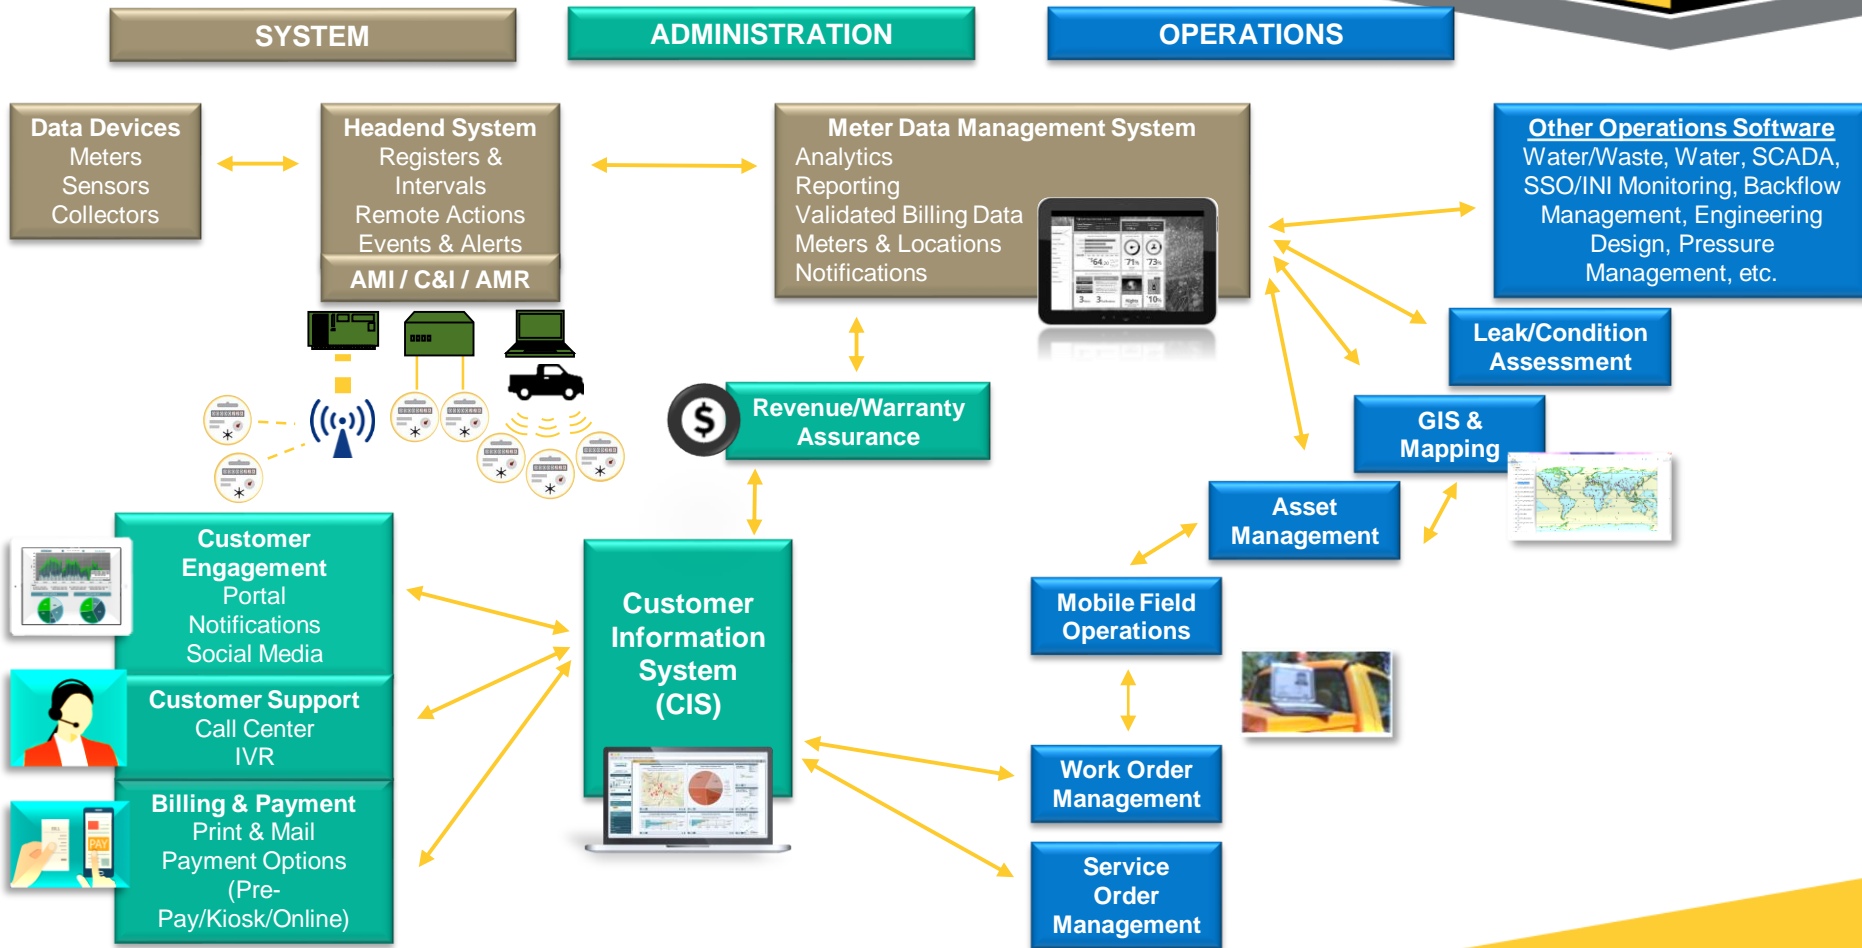

Infrastructure and Integrations

- All SaaS infrastructure hosted by APC/Sensus in Alabama
- Proven and flexible approach across customers with different deployment patterns
- Proven utility solution integrations

Infrastructure and Integrations

Operation Infrastructure Beyond Meters

Way Beyond the Meter

Transmission

- Pressure profiling
- Pressure Transient monitoring

Water Distribution

- Water Metering
- Leak detection
- DMA Prioritization
- Water Balance

Distribution

Pipe Risk Assessment

- Risk of failure
- Consequence of failure
- CIP prioritization

Transmission and distribution

Distribution Level Water Quality

- Water quality prediction and optimization
- Level of service optimization for boil water notices.

Meter Data Analysis

- Payment Risk Mitigation
- Meter replacement plans

Source Water Quality and Energy Efficiency

- Water quality from raw supply
- Energy cost and consumption optimization

Treatment Optimization

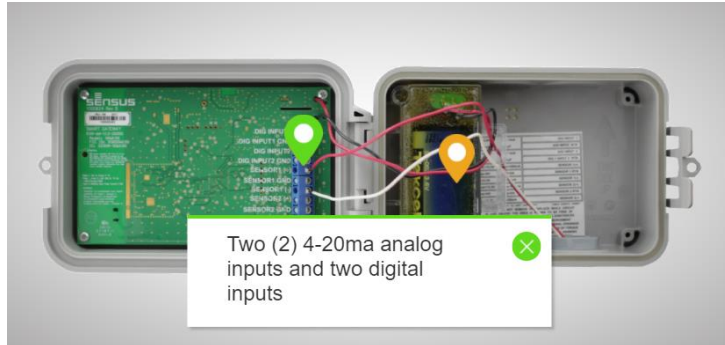

- High-efficiency aeration management systems
- Preventative management
- Treatment plant optimization

Wastewater Networks

- SSO reduction
- WW Network operation optimization
- CIP prioritization

Retro-fitting to an urban environment

Downstream sensor

Smart Gateway

User Interface

- SaaS RNI (Existing Headend)

Comms Layer

- Input
- connectivity to AMI network
- ded to canal setting, include brackets, GFCI, and condu

Sensor Layer

- A output
- power

a xylem brand

YSI Water Quality Monitoring

Utility Science, Systems & Software (US³)

WATER QUALITY MONITORING

Water quality parameters including pH, conductivity, temperature, turbidity and dissolved oxygen. Integration into the web, SCADA or handheld.

STORMWATER MONITORING

Real-time Stormwater Monitoring using standard off-the-shelf Utility IoT products. Measure water level, flow, weather station results and water quality.

FLOOD MONITORING

Monitor City and County Wide Flood Status, in Real-Time. Activate lighting for events or emergency conditions. Control via Web or Handheld.

Utility Science, Systems & Software (US³)

QUESTIONS?

Ownership Options

With either option APC will work closely with the customer to ensure the meters selected are compatible with the APC transmitter

OPTION ONE

Meter Read Only

AMI Standard – Sensus RNI meter reading with analytics

+

Customer utilizes existing meters or purchases meters / transmitters

5, 10 or 15-year term

OPTION TWO

Meter Read & Lease

AMI Standard – Sensus RNI meter reading with analytics

+

Customer leases meters / transmitters from APC

15-year term

APC FlexNet Network

Customer Base

- 1.53 Million Devices on the Network
- 700+ Base Stations and Growing
- 99.90% Read Success Rate

Service Territory

- Early Adopter
- Advanced Applications
 - Outage and Restoration
 - Voltage Monitoring
 - Customer Phase Detection
 - Capacitor Bank Monitoring
 - Demand Response

APC Metering Solutions

An APC-managed service for utilities that will offer remote meter reading capabilities to water, gas and electric systems in a secure environment using the AMI network.

By leveraging our AMI infrastructure, we can increase speed to market and lower the overall network cost to our customers

UTILITY SERVICES
**Advanced Metering
Infrastructure**

Common Pitfalls with AMI Meter Reading

Significant capital investment

Capital required to upgrade meter and network infrastructure

System integration issues

Billing errors from improper meter registration/installation

Lack of industry-wide standards for AMI systems

Components from different manufacturers may be incompatible

Partnering with Industry Leaders

Network infrastructure provider
AMI Network maintenance
Potential for capital provider

Manufacturer of product
Software provider
Data hosting

Distributor of product
Expert product knowledge
Billing integration support

Sensus certified installer
Warranty assurance option
Monitor of analytics

Utility billing software
Work order management
Back-office solutions

SENSUS Analytics

Long-term data storage (3+ years)

Consumption intervals, alarms and voltage
Data integration (GIS, Asset Management, Billing)
Ease of exporting

Robust reporting and visualization of data elements

Modular and flexible design

Data access, insight and analytics

Functionality can be used in lieu of MDM
